The Company

World Best Trading Co. LLC (WBT)

specializes in Burma Teak Timbers and related products.

Founded in Dubai in the year 1990, WBT has built its reputation for large scale supply of exotic Teak Timbers in the Middle East, South Asia and Europe due the quality of goods and subsequent recommendation by satisfied customers. Such is the popularity of Burma Teak that it is often been regarded as "The King of Timbers" by various craftsmen.

This incredible reputation of Burma Teak and the firm's experience in the timber business lead to the further diversification into manufacturing of Teak related finished products. With an aim to enhance your living spaces, WBT is extremely pleased to present luxurious doors carefully handcrafted using only the finest Teak Timbers.

This catalogue showcases various kinds of ready and custom doors manufactured at the group's in-house workshops in Myanmar.

What makes Burma Teak special?

Having being in the timber industry for many years, we believe Burma Teak to be the best timber for all retro and urban living spaces. Some of the main reasons for its widespread usage are highlighted as follows.

Natural: Although Teak is now grown as plantations in many countries, there are only a few places in the world where ancient teak is found. One of them, being the dense forests of Myanmar. Ancient Burma Teak is naturally grown without any external care, for a long period of time, to be much denser and hence more durable to hostile conditions. From being used as decking of the great Titanic to building British settlements in Rangoon, Burma Teak has been the first-preference timber for several designers.

Aesthetics and Sturdiness: Has a unique combination of elegance and durability making it a desirable wood in many households.

Resistance to termites, bacteria and water: The natural oil, containing an important Iron composition, of a Teak Tree provides maximum resistance to termite attack and even protects the tree from decay, insects and bacteria.

Teak's massive usage in outdoor furniture is also due its oil providing resistance to water and thereby preventing dampness.

Valuable investment: Many regard investing in Teak furniture to be a worthwhile proposition. Old and refurbished pieces of Teak Furniture in some of the world's finest palaces and hotels have gained a jewel like reputation over the years.

Sustainable: Myanmar has a long tradition of scientific forest management and engagement in various initiatives to promote sustainability. Furthermore, major restructuring of the Myanmar Timber Industry in 2014, Logging is undertaken in a much more transparent and sustainable setup matching the international standards of relevant authorities. The government commits to sow as many saplings in order to compensate for the procurement of one timber log from the natural forests.
